En las embarcaciones se procederá a valorar por separado el buque sin motor y la motorización, excepto en el caso de las motos náuticas en que se considerará de forma conjunta, conforme a los porcentajes reflejados en la columna «A motor y MN».

El valor consignado en la relación es el correspondiente al del barco sin motorización y servirá de base para la actualización según los porcentajes de valoración en función de la antigüedad en cada caso, según sean embarcaciones a vela o a motor.

El valor base de la motorización, complementaria en el caso de embarcaciones a vela y fundamental en las embarcaciones a motor, se obtendrá, según la valoración base del motor marino, actualizándolo según los porcentajes de valoración en función de la antigüedad del equipo propulsor en cada caso.

El valor actualizado total se obtiene por la suma de los valores actualizados de embarcaciones sin motor y motores marinos obtenidos anteriormente.
